

Presentation Brunel

Brunel Belgium, part of Brunel International, provides experienced specialists in Engineering, ICT and Life Sciences to Belgian businesses, multinationals, banks and insurers, and to the government. Our flexible service brings together highly qualified talents and employers for short- and long-term projects.

Since its foundation in 1975, Brunel has developed globally into a listed company, operating from within its own international network of 106 offices in 37 countries. This enables Brunel to provide its clients with specific, specialised knowledge and extra capacity, both at local and international level.

Brunel thanks its unique reputation to its strength and stability and follows its characteristic cultural values: 'entrepreneurship', 'result-driven approach' and 'operational excellence', in all of its activities. And yet it's the Brunel staff themselves who truly make the difference. Their motivation, passion and energy are at the heart of our success formula.
